# cargowise neo

A PREVIEW

cargowise neo

- Fully web-based and live, real time connected to CargoWise One.

- Neo allows logistics service providers (e.g: freight forwarders, customs brokers, warehouse operators, and other service providers) to provide a modern portal to engage and empower their customers (Beneficial Cargo Owners or BCOs).

- Neo provides a comprehensive management portal or "control tower" for all the BCO's logistics needs. Including booking, tracking, inventory, invoicing, statements, reports, and other management needs.

- A place to communicate/interact with the logistics service provider.

- A place where the BCO can interact with the data and provide verification and validation of data, and interact with and resolve compliance and supply chain risks and issues.

- A replacement for CargoWise WebTracker, to be retired this year.

- An expandable platform that will continue to add valuable labor and cost saving capabilities to both the logistics provider and their customers and partners.

Here is a short walkthrough of the some of the components of Neo...
